

ORLANDO JR. A. DELA CRUZ

Frontend Developer (React.js)

San Antonio, Quezon, Philippines | +63 909-598-4478 | orlando.delacruz.dev@gmail.com

Portfolio: orlandodelacruz.vercel.app | GitHub: github.com/orlando-delacruz

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building production React.js and TypeScript applications, admin dashboards, and responsive interfaces using JavaScript (ES6+), Next.js, REST and GraphQL APIs, and modern UI libraries. Experienced collaborating with backend teams and stakeholders to ship deployed, production-ready features for real clients, including international businesses. Comfortable working across the stack (Laravel) when needed, with a primary focus on frontend architecture, state management, and component-driven development.

TECHNICAL SKILLS

Front-End: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Styled-Components, Ant Design, Bootstrap, Framer Motion

State, Data & Forms: Zustand, TanStack Query (React Query), React Hook Form, REST APIs, GraphQL

Back-End & Database: Laravel (PHP), MySQL, Supabase

Tools & Platforms: Git, GitHub, Vite, Vercel, Postman, Figma, Chrome DevTools, Lighthouse, CI/CD

Core Skills: Responsive Web Design, Accessibility (WCAG), UI/UX Design, Performance Optimization, Agile/Scrum, Version Control

WORK EXPERIENCE

Web Development Intern — Monte Carlo Technologies

San Pablo City, Laguna | February 2025 – May 2025

- Developed responsive front-end interfaces using Laravel Blade templating, JavaScript, and CSS for international client websites, including businesses based in Texas, USA.
- Designed UI/UX wireframes and prototypes in Figma and implemented corresponding back-end features using Laravel and MySQL.
- Collaborated with developers and stakeholders to deliver production-ready web applications on deadline.

Freelance Web Developer — Self-Employed (Remote)

January 2025 – Present

- Architect and deliver responsive client websites end-to-end using React.js, TypeScript, and Tailwind CSS, reducing initial load time on client sites from ~4s to under 2s through code splitting and asset optimization.
- Manage the full project lifecycle — requirements gathering, development, testing, deployment, and post-launch maintenance.
- Deploy live sites via Vercel using automated Git-based CI workflows, integrating REST APIs for dynamic content.

PROJECTS

Leidi Bud Dentals — Dental Clinic Management Platform

React, JavaScript, Supabase, Ant Design, Zustand, TanStack Query, React Hook Form, GraphQL, REST, Vite | Full Stack Developer, Freelance | 2026 – Present

Live Demo: <https://leidibuddentals.vercel.app/> (client project — codebase private)

- Develop a full-stack clinic management platform with a public booking engine, staff admin dashboard, and CMS-driven marketing content, engineering conflict-free scheduling with 15-minute intervals and Supabase real-time subscriptions for instant slot updates.
- Improve time-slot loading speed by 60–70% by parallelizing database queries and caching static data; implement Row-Level Security (RLS) policies for role-based data access.

SANHS QC System — Equipment Quality Control Platform (Capstone Project)

React.js, GraphQL, Apollo Client, JavaScript, Git, Agile SDLC

Live Demo: <https://qc-system.vercel.app/> (school-affiliated system — codebase private)

- Build the frontend for an equipment QC platform as part of a 4-developer Agile SDLC team, consuming Decision Tree and LSTM machine learning model outputs via GraphQL for real-time equipment classification and predictive maintenance insights.
- Implemented role-based access control with protected routes in React Router, cutting inspection logging time from a full day to under an hour; awarded Best Capstone Project for technical execution and innovation.

Church Attendance Tracker — Attendance Management System

React, Supabase, Zustand, TanStack Query, GraphQL, REST, Styled-Components, Vite | Full Stack Developer, Personal Project | 2026

Live Demo: <https://sabbath-school-attendance-sasda.vercel.app/> | GitHub: github.com/orlando-delacruz/church-attendance

- Built a full-stack attendance tracking system in 4 days, using Zustand and TanStack Query for real-time attendance recording, member management, and family grouping.
- Implemented Supabase authentication with Row-Level Security policies and configured the app as an installable Progressive Web App (PWA) with offline support.

EDUCATION

Bachelor of Science in Information Technology

Pamantasan ng Lungsod ng San Pablo | 2022 – 2026

- Cum Laude
- Best Capstone Award — SANHS QC System

CERTIFICATIONS

TESDA National Certification II (NCII) — Computer Systems Servicing | 2022
